

1. FCC is supposed to be protecting the Public's Right to Be Informed. There is a Dangerous Trend emerging of the Media becoming the propaganda instrument of narrow political interests.

Recently, Sinclair Broadcasting's decision from the top administration which is 100 percent Republican, to force their stations to air a blatantly anti-Kerry documentary days before the election and call it 'the News' is a clear example of the dangers of media becoming a propaganda arm of Narrow Interests.

To have a democracy, we need a media that is fair and does not represent Big Money.

Isn't it true that Sinclair uses the public airwaves free of charge, and is obligated by law to serve the public interest. Their airing of this Anti Kerry Documentary is not NEWS, it is political propagandizing.

Don't become like the Federal Energy Regulators with Enron: allowing the Big Corporations to exploit the public for their Private Selfish Interests.

Disipline Sinclair Broadcasting.

Thank you,

Philip wagner
